

The following table shows the results of the regression analysis. The dependent variable is the log of the number of employees. The independent variables are the log of the number of sales, the log of the number of assets, and the log of the number of liabilities. The R-squared value is 0.85, indicating a strong fit.

Table 1: Regression results for the log of the number of employees. The dependent variable is the log of the number of employees. The independent variables are the log of the number of sales, the log of the number of assets, and the log of the number of liabilities.

Variable	Coef.	Std. Err.	t-Statistic	p-Value
Intercept	1.50	0.10	15.00	0.0000
Log Sales	0.85	0.05	17.00	0.0000
Log Assets	0.10	0.02	5.00	0.0000
Log Liabilities	0.05	0.01	5.00	0.0000
